- Sodium:** By 2020, 75% of our Foods portfolio (by volume) will meet salt levels to enable intakes of 5g per day (benchmark consistent with WHO 5g/ day). The threshold for sodium have been defined based on product group approach, as defined in our Highest Nutrition Standards (refer image). For Example- For our Tomato Ketchup & Sauces (water-based sauces category), we will aim a 15-30% sodium reduction by 2020 to meet the benchmark of 750mg sodium /100g.
- Trans Fat:** We have already removed trans-fat originating from partially hydrogenated vegetable oil, from all our products. We undertake regular reviews of our products to ensure we continue to be compliant.
- Reduce Calories:**
  - Children's Ice Cream-** 100% of our children's Frozen Desserts & Edible Ice portfolio contains 110 kilocalories or fewer per portion. In addition, our ambition is to reduce sugar to a maximum of 12g/portion by 2020.
  - Packaged Ice Cream-** 97% of our packaged ice cream products do not exceed 250 kilocalories per portion\*.

\*A portion is defined as: a pre-packed single-serve ice cream product meant to be consumed in one go or 100 ml when sold in packaging aimed at multi-consumption moments such as tubs.
